

Yellow Comet Megatank instructions

step 1

glue
toothpick
hobbyknife
small metal rod
rubber cutting mat

Yellow Comet Megatank
The best way to take out a Megatank in the 2005 Nintendo DS turn-based strategy game Advance Wars Dual Strike, is from far away. Either from the skies with a Bomber, or with long-range units like Rockets or a Battleship. And even then you will have trouble bringing this behemoth down! Maybe the best thing to do might be to just wait until it runs out of Fuel...

parts printed on thicker paper

p. 1/4

Print the parts on thicker paper (I use 200 gsm myself) and get out your papercrafting tools!

step 2

Cut out and pre-shape parts 1 and 2. Don't forget the four slits you need to cut on part 1!

step 3

part 3
part 4

Glue parts 1 and 2 together (the "stepped" side of part 2 on the same side of the longer "flaps" on part 1) and then cut out and glue on parts 3 and 4 underneath.

step 4

Cut out and assemble part 5, then glue it on top of the hull by pushing the two longer glueing tabs through the slits you made on part 1.

step 5

Cut out and assemble part 6, then glue it on top of part pushing part 5 through the hole. Assemble parts 7-10 and glue them to the sides as indicated.

step 18

Black Hole Megatank

The only difference between the Allied Nations' Megatanks and the ones from Black Hole, is who's driving it.
